Working prototype

Windows processing with a mobile web interface

01 / OPEN THE MAP

Indoor map connected

Take a photo or choose one from the album.

02 / FOLLOW THE ROUTE

Turn right

Follow the path to Dining Table Waypoint 6.

7 steps remain.

03 / RE-LOCALIZE

Near the destination

Entrance / shoe-cabinet Waypoint 1.

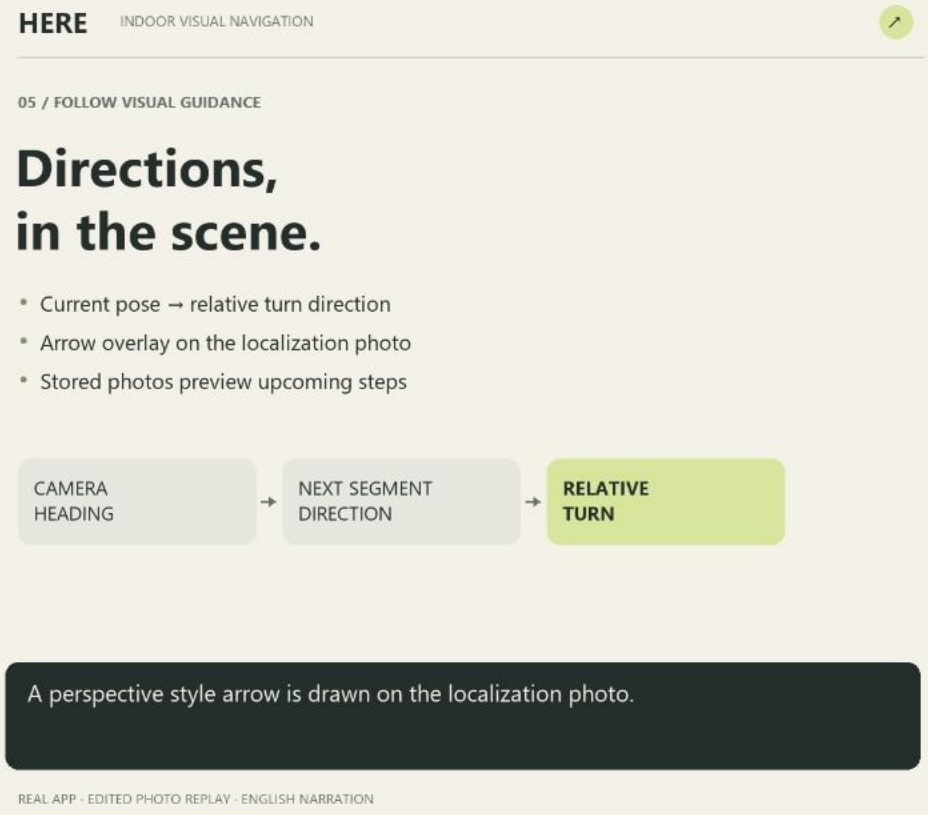

Check the physical sign.

Original Chinese UI; English translations shown alongside each capture.

Arrival uses a registered-image replay. On-site walking validation remains pending.

Demo and technical evidence

68-second English narration · real photos and computed camera poses

ACTUAL APP CAPTURE

RECORDED LOCALIZATION

68 2D–3D correspondences
1.68 px median reprojection error

PREBUILT MAP

141 registered cameras
35,040 sparse points

SOURCE AND SETUP

GitHub: Kugel-M/Here
Source, video and map

Photo → COLMAP camera pose → A* route → scene-photo arrows

Arbitrary model scale; static photo overlays. Candidate routes require field verification.
